Singapore Airlines wishes you a Merry Christmas and a Happy New Year!

Singapore Airlines announces flights between Brussels and Singapore

Singapore Airlines will be starting off the new year with great news: Brussels will become the latest European destination in Singapore Airlines' route network next year.

Subject to regulatory approval, the first flight will be launched on 25 October 2020 from Singapore. Flight SQ304 will depart Singapore on Wednesdays, Thursdays, Fridays and Sundays at 2355hrs (local time). The return sector, operated as flight SQ303, will depart Brussels on Mondays, Thursdays, Fridays and Saturdays at 11:20hrs local time. Singapore Airlines will operate the Airbus A350-900 on these flights.

On Monday 16 December 2019, the new route was announced during a successful press conference in Zaventem. Both the Belgian and Dutch media picked up on the announcement as the news was shared through various media channels such as on TV, radio and online.

Tickets for the new Brussels flights are available for sale via all distribution channels.

Flight Numer	Days of Operations	Time of Departure	Time of Arrival
--------------	--------------------	-------------------	-----------------

SQ304 Singapore - Brussels	Wednesday, thursday, friday, sunday	2355hrs	0650hrs
SQ303 Brussels - Singapore	Monday, thursday, friday, saturday	1120hrs	0655hrs

Singapore Airlines to increase capacity from Amsterdam

Singapore Airlines will increase its capacity on route from Amsterdam to Singapore for the winter season of 2020/2021. Because of the growing demand between Amsterdam and Singapore, the route will be operated effective as from 25 October with a Boeing B777-300ER replacing the current Airbus A350-900LR.

To this day, flights from Amsterdam are operated by the Airbus A350-900LR in a three-class configuration. This airplane will be replaced by the Boeing 777-300ER.

With the introduction of the Boeing 777-300ER, the capacity of Business class and Premium Economy Class will expand. Simultaneously on this route, the First Class cabin product will be introduced. The Boeing 777-300ER has larger freight capacity, which can carry up to ten tons extra cargo.

Next to Amsterdam as a boarding point, Singapore Airlines offers 4 flights per week departing from Dusseldorf and starting October next year from Brussels. This will continue to increase the connectivity in the Benelux.

Highlight: Our extensive SIA Network

Singapore Airlines connects Europe to Singapore and beyond. Singapore Airlines, SilkAir and low-cost subsidiary Scoot maintain a route network of more than 130 destinations, with a seamless layover at Changi Airport, to major cities in Asia, Australia and New Zealand. With Brussels added to one of the many European gateways, Singapore Airlines is expanding its footprint in the world.
