

Latest from Slovenia:

NEWS FROM SLOVENIA

WE'RE MORE THAN READY FOR TOMORROW (AND YOU)...

A year ago planning a (weekend) getaway seemed "nothing special". Travel was "nothing special". Everybody could do it. The only limits were your budget and your time. Then 2020 came and turned things upside down. And the world practically stopped. For a moment it seemed that there's no way out.

But after some time, we have adapted to the new normal. Travel has adapted as well. The world has become more precautionous and we could say safer - especially when it comes to health and hygiene.

Slovenia was one of the first countries that realised something needs to be done to help tourism industry to recover. This is why the Slovenian Tourist Board developed responsible

travel standards communicated under [the GREEN & SAFE label](#), which offer an upgrade of sustainable practices with a new responsibility to local communities and guests.

And today we are thankful that world's most renowned (travel) media have noticed our efforts too. For, as the African proverb goes, tomorrow belongs to the people who prepare for it today. And in Slovenia, we're more than ready for tomorrow and for your visit.

**LAKE BLEED ON THE
ULTIMATE TRAVEL LIST**

**LJUBLJANA AMONG THE
CORONAVIRUS-SAFEST**

Lake Bled has been named the 6th-best experience on the Lonely Planet's Ultimate Travel List.
